visits data call due cob Thursday 11/1

Folks,

We need you and your teams to look at the attached spread sheet to familiarize yourself with the information leadership is looking for and then add it to the spread sheet and ship back to Kristen and me by the end of the day Wednesday, October 31. We will consolidate items from each of you into one document.

We need to respond to the Director's office by Thursday, November 1.

I think we have a good opportunity to plug in one - maybe two items - per state here. Thinking about the Crayfish delisting for Tennessee and Least Tern in Mississippi for down-listing, de-listing progress.

Any youth hunts, hunting opportunities at given refuges that have been newly created or expanded in the last two years thinking about more public access, additional hunting and fishing opportunities. Sambar hunt at St. Vincent if Sec will be in Florida's panhandle at the right time and we could pare it with a hurricane related tour.

Dam removals or fish passage projects that happen in the near term or have been completed in the last year or so and would make a good visit to support expanding access to fishing opportunities and boosting local economies.

Also thinking about the Partners program and any notable projects over the past two years to support At-Risk and down-listing / de-listing achievement. What do you think about a tour of the coastal headwaters with some of our investor friends in the Florida panhandle maybe?

Just some ideas for your thinking.

Subject: Action - potential site visits data call due cob Thursday 11/1

Regional Directors:

We have been tasked with an assignment to help the Department better coordinate potential visits that highlight and acknowledge activities, sites, and projects where change has been driven in alignment with the established Secretarial Orders and Priorities. (The Secretary's Priorities are included in the spreadsheet, and the Orders include sportsmen access, recreation, urban refuges, etc).

To do this, all bureaus are being tasked to generate a list of where it may be appropriate for the Secretary to visit (or other members of the political leadership team).

Each Region needs to prioritize 1-3 projects/facilities/sites in each State that the Service operates. (Some examples include the Washington State Veterans Hunt, spring turkey hunting, First Catch Centers, etc).

Also, if there is a project that is timeline driven, such as future announcement or project unveiling, that would be helpful to know and that information would go into the Timing and Notes Sections. At this point there does not need to be a lot of project detail in the spreadsheet; however, once ASFWP submits this document, if more details are requested on a project a briefing memo of further details should be readily available.

In order to meet our deadlines, we will need this worksheet **by COB Thursday, November 1st**. Please respond to Kashyap Patel and cc Steve Guertin and Barbara Wainman and Melissa Beaumont.

Thanks in advance. Steve

One project possibility is the East Collier HCP. It has been on the Department's RADAR through SO 3355 and meets several Secretarial priorities (e.g., striking a regulatory balance).

The Secretary is often invited to a state to meet with a governor, give a speech, or attend a specific event. He often has availability for additional events. This spreadsheet is intended to collect evergreen ideas for secretarial visits. Please include 2-3 ideas for each state in which your bureaus operate.

- Secretarial Priorities:
- 1. Create a conservation stewardship legacy second only to Teddy Roosevelt.
 - 2. Sustainably develop our energy and natural resources.
 - 3. Restore trust and be a good neighbor.
 - 4. Ensure tribal sovereignty means something.
 - 5. Increase revenues to support the Department and national interests.
 - 6. Protect our people and the border.
 - 7. Strike a regulatory balance.
 - 8. Modernize our infrastructure.
 - 9. Reorganize the Department for the next 100 years.
 - 10. Achieve our goals and lead our team forward.
